# **WEATHER SYNOPSIS BY REGION**

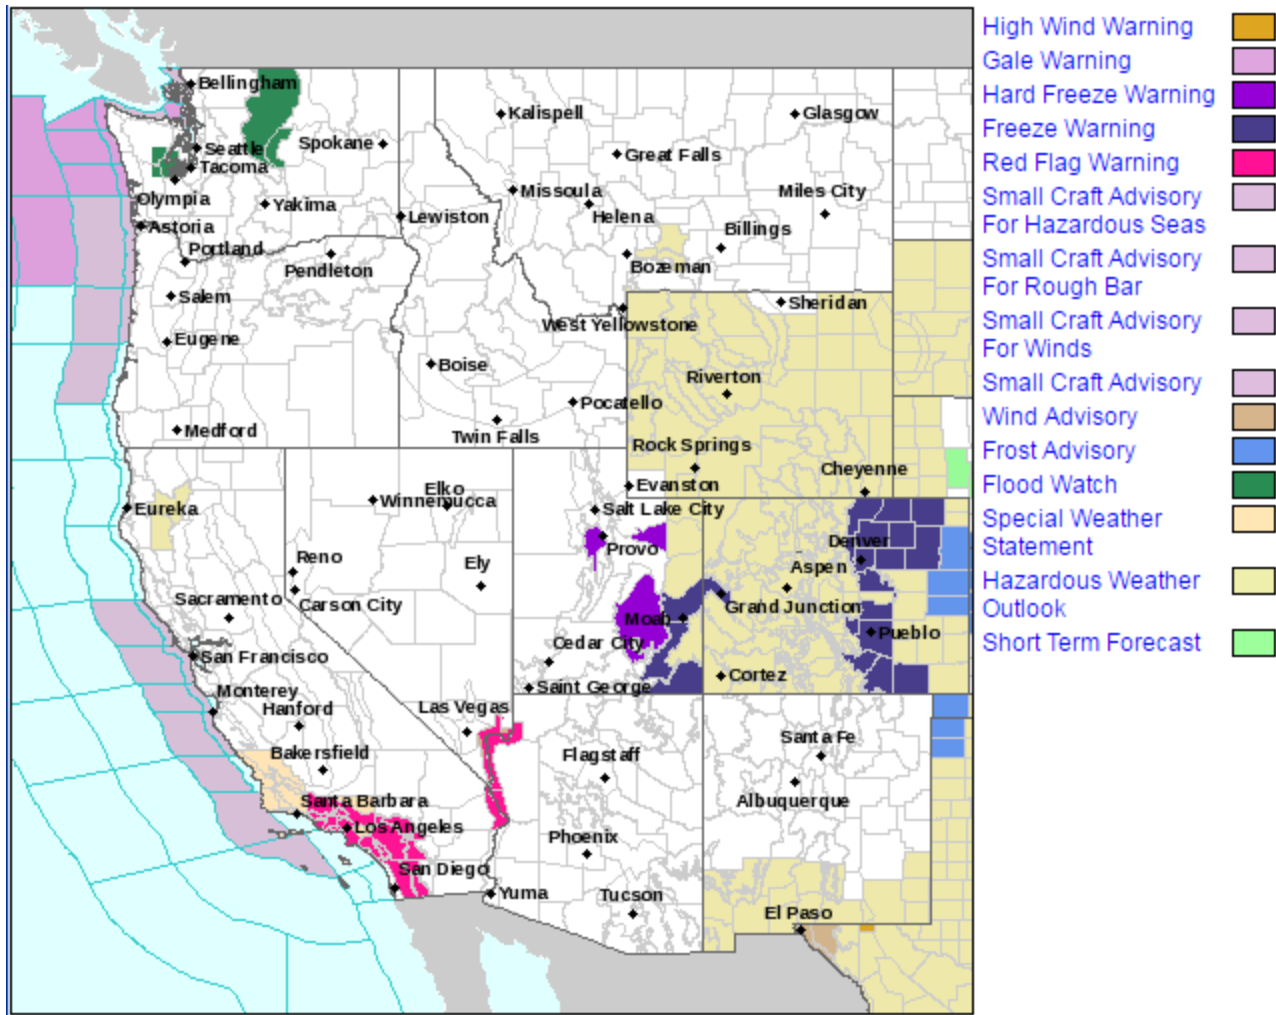

## **NORTHERN CALIFORNIA**

The last of a series of weather systems will be moving east through the region today with more showers, mainly this morning. A high pressure ridge will arrive along the coast tonight and move inland over the next few days. The weather will become warmer and dry. Some gusty north to northeast winds will also develop tonight for the favored areas in the Sacramento Valley and surrounding foothills. Local gusts around 28 mph are expected. These winds will become quite a bit lighter Wednesday and linger into early Thursday. Although quite a bit of drying is expected in the windy areas, the duration will be pretty short and the drying effects are not likely to be sufficient to dry fuels out enough to elevate fire potential. Thursday the ridge will be over the Great Basin, and we will be in between weather systems. Some cloudiness and a slight chance of showers will return to the far northwest corner of the state while the rest of the region remains mostly sunny. A low pressure trough will be off shore Friday, but things will probably continue to be about the same as Thursday except cooler. The trough will hang off shore through the weekend with periods of variable cloudiness over the region. The far northern areas may see a few showers, and periods of moderately gusty southerly winds will develop. More cloudiness and showers will gradually spread across the region early next week for cooler and moister weather again.

## **SOUTHERN CALIFORNIA**

A transition from north to northeasterly offshore flow will begin today as surface high pressure shifts into the Great Basin. Early this morning, winds are gusting out of the north-northeast across northern Los Angeles and Ventura Counties. Expect the gusty winds to expand to include the San Fernando Valley, Santa Monica Mountains and most of the Inland Empire later today. The strongest winds during this offshore wind event may occur near highway 126 from the Santa Clarita Valley into Ventura County where northeast winds of 20-30 mph with higher gusts can be expected this evening into the overnight hours tonight. Northeast winds will also develop over the Santa Ana Canyon and much of Orange County later today. Although it will not be as windy over the rest of the area, temperatures will jump 10 degrees or more over most coastal areas with highs in the 90s possible across most of Southern California west of the mountains. Minimum relative humidity (RH) will drop into the single digits this afternoon. Tonight, expect little, if any, RH recovery. Warm temperatures overnight will allow temperatures to be close to 100 in the warmest inland valleys and foothills on Thursday. It will also be very warm across the central coast region Thursday. Conversely, the San Joaquin Valley will see stable conditions resulting in widespread night through morning fog through the weekend. Onshore flow will slowly return Friday and temperatures near the coast will cool 5-10 degrees. Expect a slow cooling trend to continue into the weekend, and by Monday, highs will be back to near seasonal normals. Southerly flow may develop next week, which would tap into subtropical moisture off the Mexican Coast. This may result in isolated light showers on Monday. Longer range models point to a better chance of rain during the second half of next week.

# CAL OES LAW ENFORCEMENT MISSIONS

## New Cal OES Law Missions

- **2016-LAW-27548, 10/18/16, 1940 hours**, Inyo SO SAR, who is working with Sequoia Kings Canyon National Park (SKCNP), is requesting The China Lake Mountain Rescue Group (CLMRG) to assist in the search for a missing hiker on Wednesday, 10/19/16. The missing person (MP) is overdue two days from hiking/fishing. Minimal info regarding his route info. The MP, a 74 year old male, 5'5" 150 lbs. Brown/Brown, wearing a blue shell jacket and a baseball cap, was reported missing by his sons who are also assisting in the search. The MP sent an OK signal from his SPOT device at 1844 hours on Saturday, 10/15/16. His vehicle was located at 2100 hours on 10/17/16. CHP H40 is assisting with recon flights on Inyo side, and the National Park Service (NPS) helicopter is doing the same West of Bishop 1625 hours. Update from SKCNP Rangers: Aerial recon complete. Footprints noted but no humans seen. Ground crews being released until Wednesday. No other flights until tomorrow due to weather. The CLMRG will report this morning, 10/19/16, for a briefing before being deployed. **Mission Ongoing.**
